PACKAGE OF 4 ONE ON ONE SESSIONS SEPERATION ANXIETY

In case of problematic behaviour after assessing and analysing the cause of the manifestation, we will build in a controlled environment at home, valid and personalised strategies for each individual to give them the tools to manage the complicated situation, which will include:

Stress reduction therapy

Any disturbance of the optimal emotional state affects the nervous system and releases substances in our body. In case of stress, the levels of cortisol, the stress hormone, rise. We will be able to lower these levels with stress reduction therapy.

Protocol for leaving and arriving

We will provide your pet with predictability when leaving or arriving home.

Protocol for scheduled and gradual exit

We will gradually increase the number of exits to improve tolerance to separation

Safe area and confined space

We will provide a small, safe area that functions as a calm reference

Mental Stimulation

Environmental enrichment and obstacle courses to stimulate the mind

Emotional management tools

Natural pharmacological supplements, anxiety wrap, residency, therapy

Introduction to group classes

In case of insecurity, basic group obedience training would be useful.

**DÍAS &
HORARIOS**

A convenir según agenda
Recomendable
1 sesión/ semana
Duración: 1 hora

AT HOME

Separation anxiety
Separation work is carried out
the usual place of residence
